Water Management , Waste Management and Plastic Ban Policy

**GOVERNMENT DEGREE COLLEGE
BICHHUA
CHHINDWARA, M.P 480111
COLLEGE CODE: 3610**

Ph.& Fax- 07162-259715, Email- hegcbicchh@mp.gov.in

**WATER & WASTE
MANAGEMENT
POLICY**

The college will adopt the principles of best environmental practice as reasonably possible in the delivery of its waste management services and ecological initiatives.

The college will apply a 'waste hierarchical approach', to reduce, reuse, recycle and recover waste products to manage its waste responsibly, reduce the volume of waste sent to landfill and maximise reuse and recycling where possible.

The College will promote water conservation and energy use efficiencies through effective programs and practices. The university will undertake possible efforts to reduce environmental footprints from university related activities via use of cleaner and eco-friendly practices/technologies.

The college recognizes the importance of compliance with applicable environmental laws and regulations as laid down by the government.

The College will review the environmental objective and targets from time to time in order to minimize resource consumption and improve environmental performance.

The College will communicate this policy to every stakeholder. The College requires that all the employees, students or anyone else making use of the premises comply with the environmental objectives set in the policy and associated Environmental Management System for upholding the spirit of the document and ensure compliance with all environmental legislations.

POLICY OBJECTIVES:

The objectives of this policy are to:

Promote holistic approach of waste management, resource conservation and green initiatives at the college campus.

Ensure that waste management is performed at collage campus in line with all waste legislative requirements.

Encourage judicious use of environmental resources to meet the needs and aspirations of the present and future generations.

Provide clearly defined roles and responsibilities to identify and coordinate each activity related to waste management and green initiatives.

Disseminate environmental awareness among students and staff members.

POLICY FOR WASTE MANAGEMENT

Solid Waste Management

The College shall apply a 'Waste Hierarchical Approach', to reduce, reuse, recycle and recover waste products to manage its waste responsibly, reduce the volume of waste sent to landfill and maximise reuse and recycling where possible.

Action Plan

Waste Avoidance and Minimization -

waste avoidance and waste minimization have to be attempted first, for which dissemination of information on technological options should be a continuing exercise

2. Segregation of Solid Waste at Source - waste into two streams Biodegradable and Dry waste (Plastic, Paper, metal, Wood, etc.) before handing it over to the collector as mentioned in Solid Waste Management Rules, 2016 laid by Government of India.

3. Reuse and Recycling - The recyclable material like plastic, tin, glass, paper and others should be handed over either to authorised waste-pickers and recyclers.

4. Solid Waste Processing and Disposal - It is advised that the bio-degradable waste should be processed, treated and disposed of through composting or any other suitable. Waste generators would have to segregate process/technology within the premises as far as practically possible and the non-biodegradable wastes shall be disposed through a responsible waste collector or agency as directed by the local authority.

Water and Wastewater Management:

The college shall undertake its best efforts for;

1. Conserve water through efficient fixtures as well as adopt rain water harvesting.
2. Minimise wastage of water in campus.
3. Treat or dispose wastewater originating from university activities in a sustainable manner as per applicable guidelines by CGWA and NGT.

Action Plan

The Liquid waste from the campus consists mainly of domestic sewage from different establishments within the campus. A techno-economic feasibility study can be initiated for arriving at an appropriate solution for establishing Sewage Treatment Plants (STPs). The effluent water can be utilised for landscaping and non-potable use.

E-waste/Hazardous waste/Biomedical Waste Management

The e-waste/Hazardous waste/Biomedical Waste originating at college premises shall be managed as per the policy or regulations laid down by Central and state government such as E-Waste Management Rules 2016, Hazardous and Other Wastes (Management and Trans boundary) Rules 2016 and Biomedical Waste Management Rules, 2016 .

Action Plan:

1. All the departments may be required to carry out an inventory of items which could possibly be classified in e-waste in the next 3, 6 and 12 months from the date of current usage.
2. An e-waste collection centre may be established for obtaining e-waste from different departments.
3. Suitable authorised vendors by the Central Pollution Control Board and willing to offload the e-waste from the campus would be invited for an auction of the e-waste.

PLASTIC BAN POLICY

Plastic Ban Policy

Following the widespread call for a sustainable environment and sustainable development, the College has decided to outlaw the use of all plastics on its campus.

There is a need for educational institutions to actively contribute to the effort of banning the use of single use plastics. So it is becoming a key responsibility of every citizen of our country not just to “Say No to Plastics” but also to create awareness among the community as whole to stop this pollution and leave behind a green and pollution free place for our future generations

- a) The institution must launch a concerted effort to cut back on plastic use in general and single-use plastic in particular.
- b) The stakeholders' usage of single-use plastic items is harmful to the environment, public health, and societal well-being
- c) Single-use plastic items contribute to environmental issues such trash in the landscape, drains, rivers and streams, and the ocean.
- d) The distribution of single-use plastic products necessitates the use of natural resources and produces greenhouse gas emissions.
- e) Single-use plastic products are a public nuisance and come with hidden costs to the environment, local governments, the state, and stakeholders.

Plastic free campus (avoid using single use plastic)
motivate the staff and students for using bicycles, public
Provisions should be made to transport and/or car pool at
least once a week for routine transportation.

Action Plan

The college shall make provisions to ban the use of single use plastic at college premises. Various awareness programmes may be initiated to motivate the staff, students and people in surrounding areas to phase out single use plastic from their schedule.:

1. Prohibit the use of single-use plastics in the college's canteens, dormitories, and other facilities.
2. Hold workshops, training sessions, and awareness campaigns on the negative effects of single-use plastics.
3. urges instructors, staff, and students to refrain from bringing non-biodegradable plastic goods to the college.
4. Motivate pupils to make their own homes "plastic free" by educating them about the negative impacts of plastics.
5. Require all departments and offices to refrain from using plastic water bottles, and promote the use of substitutes for programmes, such as jute files, paper folders, cloth bags, and paper bags, in place of plastic bottles, bags, and covers.
